

FREMONT GOES GREEN WITH THE MINI BULK DELIVERY SYSTEM

Today—more than ever—the combination of economic demands and environmental challenges is pressuring plant operations to increase efficiency, reduce costs and limit adverse impacts on the environment.

OUR PROMISE TO YOU: A BETTER DELIVERY SYSTEM

Fremont developed the Mini Bulk Delivery System, which utilizes state-of-the-art equipment to pump product directly into chemical storage tanks. Fremont's Mini Bulk Delivery is a secure, efficient and cost-effective way to deliver products to facilities that will reduce operator handling and instill safe practices into operations. We are committed to helping both your facility be more productive and to supporting you with safe practices day in and day out.

BENEFITS OF INSTALLING THE MINI BULK DELIVERY SYSTEM

Operational Efficiency and Safety

- Product delivery and transfer performed by a Fremont professional
- Reduces or eliminates handling of chemicals by plant operators
- Fewer opportunities for metering pumps to lose prime
- Eliminates need to rinse containers for disposal

Chemical Cost Savings

- Eliminates chemical waste in "heel" of containers
- Products can be purchased in bulk to reduce cost

Going Green

- No more storage of product pails and barrels onsite
- Eliminates product handling and transfer by plant staff
- No need to rinse and dispose of empty containers
- Less container waste reduces carbon footprint

To see if the Mini Bulk Delivery System is right for your operation contact a Fremont professional today.
