

FREMONT'S PARTNERSHIP WITH RENEWABLE FUELS

At Fremont, we take sustainable initiatives to heart and work with our customers throughout the renewable fuels industry to promote energy conservation, water reuse and reclamation. Fremont aims for real and lasting change; our dedication to cleaner fuel alternatives results in better air quality, environmental preservation and lower fuel cost, all while reducing our dependence on foreign oil.

RENEWABLE FUELS FOR A BETTER AMERICA

Fremont has a long history of partnering with Ethanol & Biodiesel Refiners throughout the United States. We are committed to supporting America's Renewable Biofuels markets for these industries create and sustain Rural American jobs and continue to revitalize local communities. We currently serve over 45 facilities with customized programs designed to address the specific needs and requirements of each plant.

But Fremont's support of renewable fuels doesn't stop there. We are actively involved with organizations that promote clean and sustainable fuels like the American Coalition for Ethanol (ACE), Growth Energy, Iowa Renewable Fuels Association (IRFA), and the Renewable Fuels Association (RFA).

COMPREHENSIVE PROGRAM

FREMONT SALES AND SUPPORT STAFF

The Fremont technical team is at your service throughout every step of the process. From new system start-ups to installations and upgrades, Fremont has the technical expertise and experience to streamline your water treatment operations providing the most cost-effective and sustainable program going forward.

SERVICE ONSITE

Our professionals will perform full plant water surveys to ensure your water treatment plan is of the highest integrity and efficiency. We develop comprehensive, stage-by-stage cost/benefit analyses to provide you with the most effective water treatment program available with sustainable practice recommendations.

FREMONT'S PARTNERSHIP WITH RENEWABLE FUELS

WATER TREATMENT CHEMICALS

When it comes to operating your plant, the cost of water treatment chemicals is a minimal expense. But the consequences of a poorly designed program can lead to higher energy costs and even damage your plant's capital assets. To help prevent unexpected expenses, Fremont can assess your facility's unique needs and engineer products and services specific to your plant.

REVERSE OSMOSIS SUPPORT

Using reverse osmosis water can reduce water use and minimize chemical treatment demands. Fremont has the staff personnel that specialize in reverse osmosis operations and are capable of troubleshooting and consultation. By working closely with H(2)O Innovation, for skid design and other pretreatment equipment, Fremont can provide you with the best quality water for your plant.

ONGOING TRAINING

The Process Optimization Seminar addresses a wide range of issues, from providing a technical review of key processes to implementing new process technology needed to make your job easier and your plant more profitable. By partnering with Leaf Technologies, Novozymes and PhibroChem, Fremont is able to deliver this first-rate training to your staff. Contact an account manager for dates of upcoming seminars.

FUEL CORROSION INHIBITOR

Corrosion protection is critical in the renewable fuel industry. That is why we have partnered with Innospec to provide DCI-11, a market-leading corrosion inhibitor. Innospec's newly established low-treat rate will help get you the lowest cost-per-treated-gallon in the industry. And their ongoing quality control program ensures you do not over-treat or under-treat.

SUSTAINABILITY

Fremont is dedicated to improving existing product lines and developing new technologies to better assist customers in the renewable fuels industry. We take sustainable initiatives to heart and promote energy conservation, water reuse and cleaner discharge when developing water treatment programs.

With more than 60 years in water management, Fremont can be counted on to optimize your water treatment program and increase your bottom line. We are proud to be a leader in water treatment within the Biofuels, Ethanol and Biodiesel industries and will continue to offer nothing but the best to our customers.
