

WASTEWATER SOLUTIONS

Fremont's innovative and specialized wastewater treatment solutions will effectively improve your overall water program, from primary clarification to discharge. We understand that primary wastewater treatment is critical to your plant operations, so we focus on optimizing the performance of your wastewater program and equipment to minimize costs and maximize your return on investment.

FREMONT'S PERSONALIZED APPROACH TO WASTEWATER

Fremont's wastewater treatment programs are designed to be flexible and quickly modified to meet your changing needs. Our tailored solutions can improve operational performance, maintain efficiency and reduce processing downtime for increased productivity.

Fremont is committed to assisting you with meeting your effluent treatment goals and your most stringent water quality requirements; whether it be water reclamation for reuse, reduce discharge costs, meeting NPDES permit requirements, or municipal treatment applications.

Fremont has a full-service laboratory allowing our chemists to continuously improve and develop new chemical formulations for wastewater treatment. Fremont offers a diverse range of performance products:

- Cationic and Anionic Solution Polymers
- Organic and Inorganic Coagulants
- Metal Precipitants
- Clay Combinations
- Combination Coagulants/Flocculants
- Emulsion and Dispersions
- GRAS and NSF Approved Products
- Bioaugmentation
- Odor control

Continued

WASTEWATER SOLUTIONS

CREATING SOLUTIONS AS A TEAM

Our wastewater treatment experts have the knowledge to identify the best chemical and equipment program for your plant, and will work with you every step of the way. Each water treatment program is backed by the full expertise of the Fremont team: your account manager, service technician, technical support staff, customer service and our corporate laboratory staff.

FREMONT'S WASTEWATER RESUME

Services

- Jar Testing
- Organic and Inorganic Analysis
- Wastewater Plant Startup
- BOD and COD Analysis
- Wastewater Recycle/Reuse System Design
- Field Technical Support

Expertise

- Hot and Cold Lime Softening
- Solids Clarification
- DAF
- RO and Ultrafiltration
- Anaerobic Digesters
- Recycle and Reuse of Wastewater
- Enhanced By-product and Co-product Recovery

Industries

- Chemical
- Food and dairy
- Metal finishing
- Biofuels
- Municipal
- Laundry

Fremont's advanced chemistries can increase your facility's productivity, reduce energy costs and promote water reuse and sustainable techniques to strengthen operations.

Our goal is to provide the best, most cost-effective, environmentally safe results possible that will meet your specific discharge needs. Contact a Fremont Professional today for more information.

From our first customer in 1954 to the present, Fremont Water Solutions has provided specialty chemical, equipment and services of the highest quality and value to our customers. We deliver customer-focused, results driven technology designed to maximize the efficiency of your facility's operation.
