

FREMONT'S FOCUS: WATER, PEOPLE, FUTURE

As a leading water management company, we understand that effective and reliable water treatment is important to your facility and finding you a customized, energy efficient and sustainable program is what we do best.

WATER

From the time we served our first customer in 1954, to today, Fremont Water Solutions has never strayed from its core mission of providing specialty chemicals, equipment and services of the highest quality and value. Our goal is to solve your water treatment needs with the most cost-effective solution possible using the knowledge and experience we have gained from 60-plus years in business.

PEOPLE

We provide customer-focused, results driven technology designed to maximize your facility's efficiency. But it all starts with people. We strive to build a meaningful partnership with each of our customers. Partnering with our customers means growing, maintaining and exceeding expectations every day. This starts with having well-trained, knowledgeable and passionate personnel committed to maintaining long-term relationships.

FUTURE

Our passion is water and our mission is to help our customers develop the best water treatment program available. We work closely with our customers for the successful long-term operation of their facility. By continuously offering state-of-the-art chemistries for a wide range of water-related applications, we aim to improve process efficiency, reduce operating costs, provide asset protection and promote sustainable water treatment programs for years to come.

FREMONT'S FOCUS: WATER, PEOPLE, FUTURE

Products

Our customers receive high quality product offerings focusing on custom-blended, proven water treatment chemicals, and feed and monitoring equipment. Fremont products are safe and reliable—each product batch is rigorously tested to ensure maximum performance and quality standards for ISO 9001:2008 certification. Fremont products optimize your current operations, meet government and regulatory standards, increase safety and reduce environmental impact.

Laboratory Support

The Fremont research and development team is a proven leader in the water treatment industry, and has the patents to show for it. They are also equipped to deliver accurate and expedient laboratory support to clients and field personnel. When partnering with Fremont, you benefit from our laboratory staff of degreed chemists and chemical engineers through phone and written contact, customer site visits and training seminars.

Fremont e-Link
