

TITLE: Service Technician  
DEPARTMENT: Sales  
REPORTS TO: District Sales Manager or Account Manager  
DATE: September 2016

## **STATEMENT OF PROFESSIONAL REQUIREMENTS**

### **OBJECTIVE:**

The Service Technician's main objective is to assist account managers by conducting field support at customer accounts. The position is accountable for retaining a given clientele, working an assigned service schedule and reporting problems.

- 1) Work with the specific account manager(s) to conduct routine analytical water tests to defined account base.
- 2) Check feed/control/monitoring equipment for proper function.
- 3) Check chemical inventory when on-site.
- 4) Review operator logs to determine past system performance.
- 5) Submit a report documenting routine water test results.
- 6) Inform the account manager of any potential sales opportunities or problems concerning clients.
- 7) Develop and maintain a strong working relationship with clients.
- 8) Present professional image to client base.
- 9) Be well informed with materials provided regarding the industry, company, products, chemistry, etc.
- 10) Complete paperwork as required in a timely manner.
- 11) Comply with all safety requirements as well as requirements of Fremont's quality system as they relate to this position.
- 12) Make recommendations for improvements at customer location.
- 13) Visually inspect treated systems.
- 14) May require driving a company van/truck.
- 15) Complete equipment installations.
- 16) Complete treatment product transfers and drum removals.
